

# Fabian Esteban Munoz Lopez

Systems and Computing Engineer

## PROFILE

---

Systems Engineer with experience in enterprise application development and process automation using Power Platform, Python, and SQL Server. Known for tackling complex problems with persistence and delivering innovative solutions that optimize workflows and add value to every project.

## CONTACT

---

- **Phone:** +57 312 338 5398
- **Email:** fabianfa.munoz@gmail.com
- **GitHub:** github.com/fabianf4
- **LinkedIn:** linkedin.com/in/fabianf4-dev
- **Portfolio:** fabianf4.is-a.dev
- **Location:** Sogamoso, Boyaca / Bogota, Colombia

## TECHNICAL SKILLS

---

**Power Platform:** Power Apps, Power Automate, Power Pages, Power BI, Copilot Studio, Dataverse

**Databases:** SQL Server, SharePoint, Azure Blob Storage

**Languages & Tools:** Python, JavaScript, HTML, CSS, Docker, Excel, VBA

**Other:** Process automation, requirements gathering, technical support, documentation, mentorship

## LANGUAGES

---

- **Spanish:** Native
- **English:** B1 (Intermediate)

## WORK EXPERIENCE

---

### Professional — Bank of the Republic of Colombia

*February 2025 - February 2026*

- Developed, updated, and supported internal applications with Power Platform for loan redenomination, statement and credit certificate requests, and corporate email automation
- Designed and implemented a Python solution to automate reports, extracting and filtering data from multiple Excel files, PDFs, and digitally signed documents (.p7z)
- Built a Copilot Studio bot to automatically generate an activity planner, assigning dates and organizing user tasks
- Trained and mentored intern students in solution development, error resolution, coding best practices, and interface construction

### Intern — Bank of the Republic of Colombia

*July 2024 - December 2024*

- Performed maintenance and optimization of a credit request application built with Power Apps, Power Automate, SharePoint, SQL Server, and Azure Blob Storage
- Fixed file upload failures, optimized automated workflows, and improved overall application performance
- Developed a service order request application using Power Apps and SharePoint, complemented with a monthly dashboard in Power BI
- Led requirements gathering, design, and development of a module for requesting service certificates using Power Pages, Power Automate, and Dataverse

## EDUCATION

---

**Systems and Computing Engineer** Pedagogical and Technological University of Colombia *2018 - 2025*

**High School Diploma with Systems Technician** Integrated Educational Institution Joaquin Gonzalez Camargo *2017*

## COURSES

---

- Diploma in Web Application Development — Ministry of Information and Communications Technologies (MinTIC) and Autonomous University of Bucaramanga (UNAB), 2022
- Diploma in Software Development — Ministry of Information and Communications Technologies (MinTIC) and Autonomous University of Bucaramanga (UNAB), 2022
